DETAILED ACTION

1. Claims 1-73 are pending.

Restriction Requirement

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
 - I. Claims 1-13, and 42-54 drawn to a method treating HSCs, classified in Class 435, subclass 375.
 - II. Claims 14-19, 22-32 and 55-60 drawn to composition comprising untreated HSCs in Class 435, subclass 325.
 - III. Claims 20-21 and 61-62 drawn to a method of treating a subject with a hematological disease, comprising administering untreated HSCs classified in Class 424, subclass 577.
 - IV. Claims 33-41 and 63-73, drawn to a blood product, comprising treated HSCs, classified in Class 4435, subclass 325.
3. Groups I and III are different methods. These inventions are different with respect to ingredients, method steps, and endpoints which require non-coextensive searches; therefore, each method is patentably distinct.
4. Groups II and IV are different products. These inventions are different with respect to their structures and physicochemical properties, which require non-coextensive searches; therefore each product is patentably distinct.
5. Groups II and III are related as product and process of using. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the composition comprising untreated HSCs can be used to produce conditioning media in addition to the methods of treating.

Art Unit: 1644

6. These inventions are distinct for the reasons given above. In addition, they have acquired a separate status in the art as shown by different classification and/or recognized divergent subject matter. Further, even though in some cases the classification is shared, a different field of search would be required based upon the structurally distinct products recited and the various methods of use comprising distinct method steps. Moreover, a prior art search also requires a literature search. It is an undue burden for the examiner to search more than one invention. Therefore restriction for examination purposes as indicated is proper.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

8. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michail Belyavskiy whose telephone number is 571/ 272-0840.
